SUMMARY OF QUALIFICATIONS

Passionate Backend Engineer specializing in C#/.NET and building high-performance, scalable server-side solutions. Experienced in designing core business logic, efficient database schemas, and optimized queries using .NET Core and modern architectural patterns. I also bring full-stack experience with Node.js, Ruby on Rails, and React, enabling effective collaboration across teams. Skilled in containerized deployment with Docker and committed to crafting clean, maintainable, production-ready code.

SKILLS

Hard Skills

Programming Languages: C#, Ruby, JavaScript, TypeScript, Python

Frameworks & Tools: .NET, Ruby on Rails, Node.js, Express.js, Next.js, Tailwind, React, RSpec, Docker

Databases: PostgreSQL, Mongo, MySQL, SQLite (advanced SQL, DB design)

Web Development: HTML, CSS

Version Control: Git, GitHub (branching, pull requests, code review)

Other Tools: UML (basic), Postman, Figma (basic)

Soft Skills

Problem Solving: Strong analytical skills, proven ability to debug and fix issues in real projects

Teamwork & Communication: Comfortable working in teams, sharing progress, and giving/receiving feedback

Adaptability: Quick to learn new technologies and adjust to new stacks as needed

Initiative: Take responsibility for tasks outside my comfort zone and see them through to completion

Time Management: Able to break down large tasks, prioritize effectively, and meet deadlines even in volunteer settings

EXPERIENCE / IT RELATED EDUCATIONAL PRACTICE

Resource Management App (Team Project)

2025

A web application for automated and centralized resource accounting (consumption tracking, tariff calculation, and reporting). The system was developed for a client in Lviv, which has large corporate tenants (e.g., Silpo, Galfrost), to eliminate the significant time spent by staff on manual data collection and report generation.

Role :

Fullstack Developer

Participated in database design and table management, participated in the implementation of Docker for unified deployment, and ensured full adaptability to different screen sizes.

Technologies:

React, Node.js, PostgreSQL (Neon), Docker, ExcelJS

Mayak — Psychology Platform (Volunteer Project)

2025

A free platform in Ukraine designed for the transparent search and access to quality psychosocial assistance. The resource connects users with verified specialists (psychologists, psychotherapists, psychiatrists) and organizations. Features include detailed search functionality and filtering by therapy type (individual, family, group, etc.) and format (online/offline).

Role:

Fullstack Developer

Refactored and optimized CRUD methods and strengthened database validation rules. Improved the overall interface design (UX) and implemented internal architectural enhancements for system stability under load.

Technologies:

JavaScript, Next.js, Node.js, React, Docker, PostgreSQL (Neon), Vercel, Sentry

Askify — Q&A Portfolio Platform (Personal Project) 2025

Web platform combining a personal portfolio with a Q&A system. Users create/update their resumes, others ask questions directly on profiles, building community knowledge and reputation.

Technologies:

Ruby on Rails, SQLite, HTML, CSS, JavaScript, RSpec

StudyWith - Course Platform (Team Project) 2024-2025

Platform for online courses with tools for content creation and interaction between students and instructors. Worked on backend, frontend, DB integration, course management, video notes, and testing.

This project was developed as part of an educational program by SoftServe.

Role:

Fullstack Developer, Designer

Technologies:

PostgreSQL, Node.js, HTML, CSS, JavaScript, Figma, Jira

Cinema Ticket Booking and Purchase Website (Course Project) 2024

Full-stack ticket booking application with real-time seat selection, Stripe payment integration, and automated QR code generation for tickets. Implemented dynamic seating layout and secure transaction processing.

Technologies:

MySQL, Node.js, HTML, CSS, JavaScript, Stripe API

EDUCATION

Higher education (bachelor) 2023 — Present

National University of Lviv named after Ivan Franko

Faculty of Electronics and Computer Technology

Major: Computer Science and Information Technology

ADDITIONAL EDUCATION (COURSES, TRAININGS)

IT Project Garage (SoftServe) October 2024 —April 2025

Languages: Ukrainian – Native | English – Intermediate (B1-B2)
